Application for Software Engineering Internship

Dear Hiring Manager and Hiring Team,

I am writing this letter to apply for the position of software engineer intern at your company. I am currently in my final semester in Computer Science at To-Oh University, and I've spent the past few years developing my skills in full-stack development, machine learning, and software architecture. The tools and frameworks I'm proficient in are listed on my CV.

During my internship with the National Police Agency, I worked on internal tooling that assisted in data handling and security audits. The experience gave me exposure to working on serious, mission-critical systems, and taught me the importance of accuracy, accountability, and thorough research in development.

I value clean code, thoughtful systems design, and working on projects that serve a meaningful purpose. I believe your company is a place where I can grow, contribute to real-world solutions, and continue refining my skills alongside a capable team.

I am available to begin working from the 1st of June, 2025, and I'm happy to interview at your earliest convenience.

Thank you for your time,

Light Yagami
